

RESOLUTION # _____
WETLAND PROTECTION

WHEREAS, wetlands are a critical resource throughout the Midwest and the United States and provide habitat for many wildlife species and contribute to the overall health of Midwest ecosystems; and

WHEREAS, significant acreages of wetland resources are still being lost as a direct result of inadequate base resource protection measures in the farm bill and inadequate compliance monitoring and weak penalties; and

WHEREAS, the commodity provisions of the 2002 farm bill provide indirect monetary incentives to convert wetlands to commodities production; and

WHEREAS, conversion of wetlands to agricultural use diminishes the population of many valued wildlife species and denies their recreational, cultural, and esthetic benefits to the people of the United States.

NOW, THEREFORE, BE IT RESOLVED that the Midwest Association Fish and Wildlife Agencies support stronger federal swampbuster legislation that would actually prohibit the conversion of wetlands to cropland uses by producers benefiting by farm program benefits.

Adopted: Springfield, Missouri
